

## TESTIMONIALS

"Future in Food provides a great forum for sharing experiences between companies deeply engaged in driving sustainable practices across their business. It also provides some great opportunities for networking and encouraging future collaboration around common issues."

**Padraig Brennan - Bord Bia**

"The future in food conference provided me with useful ideas and even potential solution providers in the area of sustainable business growth. I'm glad I was able to attend and would recommend it to any food business with hopes of exporting their brand efficiently."

**JP Houlihan - Murphy's Ice Cream**

Congratulations on an excellent event. The overall organisation of the event was excellent and I also found all of the presentations very informative. It was a great chance to network and to benchmark our energy management programme versus our peers.

**Peter Moran - Site Services, Abbvie Ireland**

"I met two people at the event that we can address some issues with that we are currently dealing with, one minor but one quite significant. The second one mentioned have already visited the site and we are scoping out a project at the moment."

**Jim Leahy - Site Engineering Services & EHSE&S Manager, Abbvie (Ballytynan)**

"I felt it was a very good event with lots of technical and practical advice for those embarking on or in the process of ISO27001 certification. I wish I had attended a similar event before we started our project as it would have saved me lots of time."

**Stephen McCormack - Maxol Limited**

"ISO27001 Ireland was a very worthwhile event with engaging speakers and topics. It gave insight, perspective and shared challenges. It is well worth taking time out of the office to attend. Often such conferences can have a slump in the afternoon. This one did not."

BTW: Another plus. The presentations were available ultra-quick as everyone marches on to the next thing. Looking forward to the next one."

**Michael Whelan - BT Ireland**

### FUTURE IN PHARMACEUTICALS IRELAND 18th July // Silver Springs, Cork

The Theme of Sustainability within the pharmaceutical processing and manufacturing sector has never been more important! For many years, larger organisations have been realising the fact that environmental policies and energy efficiencies within processing is directly related to the bottom line! Reducing energy costs, carbon footprint and waste during the process of pharmaceuticals can have a significant impact on the profitability of a facility. Additionally, as pharmaceutical manufacturers and their clients supply chains becomes more and more entwined they find themselves under increased pressure to reduce their carbon footprint.

### FUTURE IN FOOD IRELAND 2018 21st November // Silver Springs, Cork

Sustainability within the food and drinks processing and manufacturing sector has never been more important! For many years larger organisations have been realising the fact that environmental policies and energy efficiencies within processing is directly related to the bottom line! Reducing energy costs, carbon footprint and waste during the process of food stuffs can have a significant impact on the profitability of a facility. Additionally, as food manufacturers and their clients supply chains becomes more and more entwined they find themselves under increased pressure to reduce their carbon footprint. Future in Food Ireland will attract senior-level executives and decision-makers from the Irish food and drinks processing industry and create an environment in which to network, do business and access knowledge on the latest developments, trends, strategies and policies relating to one of Ireland's most important manufacturing sectors.
